

Your Print Management data, made clear

SOS Systems adds Intuitive Print Management Dashboards to expanding software and services portfolio

SOS Systems has today announced a new reseller agreement that will add Intuitive for PaperCut MF Dashboards from data visualization tools provider, Intuitive, to its growing portfolio of Print Management solutions.

As an Advanced Reseller, SOS Systems will offer Intuitive for PaperCut MF - a pre-integrated BI solution that comes with a comprehensive range of configurations as standard. The solution can be installed and configured rapidly and delivers outstanding data visualization capabilities at a significantly lower price point than comparable Business Intelligence solutions.

The print management dashboards deliver significant value to both the IT department and other stakeholders within the organisation who have an interest in understanding how printers and MFDs are being used by the wider user population:

- Intuitive dashboards provide an essential value-added layer to show if print management cost reduction policies are effective.
- Users can see clearly where print demand is coming from, with the latest available usage data for multi-function devices, leading to shorter & more effective decision cycles.
- The dashboards show CO2 produced as well as paper & electricity consumed by printing, so can be used to communicate environmental impact to all print users.
- Regular monthly reporting is automated and personalised for different budget holders.
- The dashboards offer flexibility to view data from the entire organisation or can be filtered to show data of interest (e.g. for one or more departments, for one or more print groups, for one or more groups of printers etc.)

Gary Tomlinson, Solutions Director for SOS Systems, commented *"We are delighted to be able to offer the Intuitive for Papercut MF Print Management dashboards to our customers across the UK. As a business, we are always looking to provide solutions that add genuine value to our customers. We believe that the Intuitive software fits the bill perfectly, as it's an excellent add-on to our already successful PaperCut solution sales."*

As Roger Stocker, Intuitive CEO explains *"Intuitive for Papercut allows organisations to identify opportunities to improve the efficiency of their print management infrastructure. It gives extra visibility to monitor the effectiveness of your print management policies and rules. This makes it a great value-add solution for papercut resellers, and we're delighted to welcome SOS Systems as an Advanced Reseller of our print management dashboards."*

About Intuitive

Intuitive is a global provider of Data Visualization Tools for Application Developers and Software Resellers. Formed by a team of highly experienced entrepreneurs and software developers the aim of Intuitive BI from the outset was to create a different type of BI solution. The team recognised that for Business Intelligence to deliver, companies needed easy-to-use tools that could be deployed to all employees and beyond organisational boundaries to customers and suppliers.

Intuitive BI sells exclusively through its network of value-added partners. We work closely with our partners in specific application areas such as Print and Process Management so that data held within their applications can be made more valuable to customers.

About SOS Systems

Established in 1985, SOS Systems is a leading provider of print and document management solutions. ISO9001:2000 accredited; we are one of a select few Canon Platinum Partners in the UK. We help customers nationwide achieve their compliance obligations and digital transformation objectives through a portfolio of innovative software and services. From secure remote printing to enterprise content management and electronic accounts payable solutions, everything is backed by our Prince2 certified professional services team.
